Our Cambridge fixtures are made to attract attention. They feature a glowing acrylic center cone complete with deep ribs as well as small glass spheres all the way around the perimeter. The decorative elements of this light are heavily embossed acanthus filigree and die cast brass canopies top and bottom. One of the nicer features of these lights is the possibility for custom cutouts in the upper ring to blend building logos with the light itself. The logos we show in the photo are from the local college we first built this fixture for. Many finish and lamping options are available.
